

Yigael Alejandro Balderrama Barriga

Full Stack Software Developer | Angular - .NET - React - Node.js

Location: Bolivia | Email: yigaelzero@gmail.com

English Level: B2 (Upper-Intermediate)

PROFESSIONAL SUMMARY

Full Stack Developer with experience building scalable, high-performance web and mobile applications using Angular, .NET, Flutter, React, and Node.js. Delivered 20+ production features and APIs across healthcare, academic, and automation platforms. Strong background in API design, clean architecture, UI/UX best practices, and performance optimization. Recognized for analytical problem-solving skills (ICPC Honorable Mentions), English Level B2, and experience in large-scale data scraping automation using Apify, Puppeteer, Cheerio, and Python. Focused on maintainable, testable, and user-centered software solutions.

TECHNICAL SKILLS

- **Frontend:** Angular, React, Flutter, HTML5, CSS3, TailwindCSS, TypeScript
- **Backend:** .NET 8/7/6 (C#), Java, Spring Boot, Node.js, Express, REST APIs
- **Mobile:** Flutter (Dart), Android
- **Databases:** MySQL, SQL Server, PostgreSQL, Firebase
- **Tools & DevOps:** Git, Docker, CI/CD, Postman, Swagger
- **AI Developer Tools:** Codex agents, Claude agents, Vercel Skills
- **Web Scraping:** Apify, Puppeteer, Cheerio, BeautifulSoup (Python)
- **Languages:** Spanish (Native), English B2 (Upper-Intermediate)
- **Other:** SOLID principles, Clean Architecture, Design Patterns

PROFESSIONAL EXPERIENCE

Full Stack Web Developer - Angular & Python

Bupunku | Bolivia - Hybrid | 2026

- Started the project from scratch for ECU, a German HMI client, helping define the initial frontend structure, reusable components, and implementation workflow.
- Developed and optimized Angular 21 features using Signals, improving UI responsiveness by ~30% and reducing unnecessary change detection cycles.
- Used AI coding agents and developer tools including Codex, Claude, and Vercel Skills to accelerate implementation, refactoring, and code review workflows.
- Standardized styling with BEM methodology in SCSS across 20+ components, reducing CSS conflicts and improving maintainability.
- Built 10+ reusable UI components using Angular Material, accelerating feature delivery by ~25% and ensuring design consistency.
- Achieved ~85% unit test code coverage and integrated Python scripts for data processing and API handling, reducing manual workload by ~40%.

Full Stack Web Developer - Angular & .NET

Pathology In Motion | Belgium - Remote | 2025

- Started full-stack healthcare modules from scratch, contributing to the initial Angular architecture, .NET API structure, and database-backed workflows.
- Delivered 3+ major healthcare modules and 15+ feature enhancements using Angular 19+ and .NET 8.
- Used AI coding agents and developer tools including Codex, Claude, and Vercel Skills to support feature development, refactoring, and technical documentation.
- Implemented secure authentication with Access Tokens, Refresh Tokens, and 2FA, reducing unauthorized access risk.
- Built 25+ reusable Tailwind-based UI components, reducing new screen development time by ~30%.
- Improved medical report and scheduling load times by ~40% through query and API response optimization.
- Designed and documented 10+ REST endpoints with Swagger for clinical workflows.

Full Stack Web Developer - Angular & .NET

Universidad Catolica Boliviana "San Pablo" | Bolivia - Hybrid | 2023 - 2024

- Started academic and administrative systems from scratch, covering initial requirements, database design, backend services, and Angular module implementation.
- Led a team of 3 developers in the delivery of academic and administrative software modules, coordinating tasks, reviews, and technical implementation.
- Developed 4 academic and administrative systems used by 500+ students and staff.
- Built dashboards, reporting tools, and SurveyJS-based dynamic forms, cutting manual data processing by ~35%.
- Implemented role-based access control across multiple modules and user types.
- Designed and optimized 30+ SQL queries, improving average response times by ~25%.

Full Stack Developer (Volunteer) - React & Node.js

START Americas Together | Mexico - Remote | 2022

- Started full-stack platform features from scratch, implementing React components and Node.js API functionality for international student workflows.
- Developed 10+ React components and Node.js API features for international student platforms.
- Integrated multiple REST APIs and improved data flow reliability across modules.
- Reduced UI rendering issues and bug reports by ~20% through refactoring.

Web Scraping Developer - Apify & Automation Intern

Salamanca Solutions / Nuevatel Bolivia | Bolivia - Hybrid | 2022

- Built 40+ automated scraping actors using Apify, Puppeteer, and Cheerio.
- Extracted and structured datasets (10k+ records per run) from Amazon, eBay, and e-commerce sites.
- Reduced manual data collection time by ~80% through automation pipelines.
- Developed custom Python scrapers with BeautifulSoup for specialized sources.

Teaching Assistant - Programming & Databases

Universidad Catolica Boliviana "San Pablo" | Bolivia - Hybrid | 2019 - 2020

- Assisted 60+ students across Programming and Database courses.
- Guided lab sessions in OOP and SQL fundamentals, improving average lab completion rates.
- Provided technical mentoring and debugging support.

PERSONAL PROJECTS

Personal Project - Spring Boot REST API

Java, Spring Boot, Spring Data JPA, REST APIs, PostgreSQL/MySQL

- Built a backend API using Spring Boot with layered architecture, controllers, services, repositories, and DTO-based request/response models.
- Implemented CRUD endpoints, validation, exception handling, and API documentation support for maintainable backend development.
- Integrated relational database persistence using Spring Data JPA and followed clean code practices for scalable Java services.

EDUCATION

Bachelor's Degree in Computer Science - Universidad Catolica Boliviana "San Pablo" - 2023

High School Diploma - Loyola High School, Cochabamba - 2017

CERTIFICATIONS

- SQL Advanced Certificate - HackerRank (2026)
- Angular Intermediate Certificate - HackerRank (2026)
- Cybersecurity Certificate - Cisco (2026)
- Problem Solving - HackerRank (2022)
- Java Programming Certificate - Faculty of Technology, UMSS (2018)
- JavaScript Intermediate Certificate - HackerRank (2018)
- HTML5 + CSS3 Course - UMSS Computer Science Dept. (2017)

ACHIEVEMENTS

- Honorable Mention - ICPC South America/South Finals (2020)
- Honorable Mention - ICPC Bolivia Preliminary Contest (2019, 2020)
